Wimford Eagle is a hamlet & chapelry
belonging to Little Toller. It belongs to the
great honour or barony of Aquila or Eagle in
surrey, which name it received from a
Norman family called Aquila.

The estate passed 36 Hen. VIII to Thos
Sydenham by purchase from the Gouch's

"The Sydenhams were an ancient family
divided into many branches. They were
originally ^{seated at Sydenham} ~~seated~~ near Bridgewater &
Kilsford (Somerset) in the reigns of
King John & Henry III. Hence issued
the various Sydenham families of
Somerset & the Wimford Eagle Sydenhams
of Dorset.

see verses to Dr Sydenham by Dr Crane
of Dorchester in the occ of a visit to the
birth place of S. Gent. Mag 159, p 1131
"With awful footsteps, stranger, tread this earth.
The place revered wh' gave to S. birth"

The chapel of W. E. is dedicated to St Lawrence
& is chapel of ease to the mother church of
Toller Fratrum. Several Ss are buried here
without monuments. They erected a building
on the south side & S.W. corner of the chapel
for a burial place, now fallen into decay.

Un de profundis

Quelques jours à Paris en 1537 l'astrologie judiciaire ou divinatrice, lesquelles leçons il avait abandonnées après avoir appris que celle astrologie judiciaire avait été condamnée par les docteurs - médecins de la Faculté de Médecine de Paris, soit dans les leçons qu'ils faisaient publiquement dans les écoles de médecine, soit dans des disputes. Indigné de ce que les opinions qu'il professait et sa divination étaient condamnées et confondues par tant de médecins ce Villanovanus fit imprimer et repa-
dit dans le public une certaine apologie, dans laquelle il attaqua par des injures certains docteurs et même l'ordre tout entier, c'est-à-dire le collège des médecins de Paris. Il prétendait la guerre les pestes, les l'oppression de l'Eglise. Il prétendait que toutes les choses dans l'homme sont dépendantes du ciel et les astres; et afin d'en imposer plus aisément aux ignorants, il confondait la véritable astronomie avec l'astrologie judiciaire.

M'étant fait accompagner de deux collègues (car j'étais alors docteur) je fis avertir le dit Villanovanus qu'il ne mit point cette apologie en lumière, qu'au contraire il aurait à s'en repentir. Il n'obéit point à ces avertissements; bien plus au contraire, en présence de plusieurs écoliers et de deux ou trois docteurs dans le cours de notre école et au sortir de la dissection d'un corps humain qu'il me qu'avait faite avec un chirurgien, il me menaça par les paroles acerbes. Il persista dans son projet et les apologies furent imprimées et par lui répandues. Par une requête adressée au Parlement, nous demandâmes que ces apologies ne fussent point mises en vente... Raymond, avocat du Roi, présenta de nouveau requête au procureur du Roi... Poussé par l'audace Villanovanus eut la témérité de se présenter. Je n'y pus aller avec quelques docteurs - médecins. Mais, à cause de certains empêchements de la cour rien ne fut fait ce jour-là. Nous nous présentâmes encore plusieurs fois, mais nous fûmes de nouveau

Lerchus. (Coul) 15

obligés de nous retirer, alors en pleine congrégation
de l'université tenue aux Mathurins, je demandai
l'admission de l'université elle-même. Toutes les
facultés m'accordaient cela avec le plus grand
plaisir. Villanovans envoya vers moi quelques
statueurs qui me demandaient que tout ce bruit
fut apaisé. J'y consentis, pourvu qu'il avouât
sa faute devant la faculté. Villanovans s'y refusa.
Il se vantait de triompher du doyen et des
médecins qu'il insultait. Il annonçait et répau-
dait le bruit par la Ville que ni la faculté de Médi-
cine ne l'université prendraient souci de l'affaire.
Je détruisis ce faux bruit, et je renouvelai ma
demande de l'admission de l'université: ce
qui me fut accordé et d'autres choses encore. En
effet plusieurs personnes priées dans chacune
des Facultés m'accompagnèrent au Parlement
et assistèrent à l'audience. Je choisis deux
avocats: M. Séguier pour l'université et M.
Jacques Le Fébvre pour la Faculté. Je les instru-
isis de ce qu'ils avaient à dire devant le
Parlement. Aussi renseignés et préparés
nous nous présentâmes le 18 Mars 1537 devant
la Cour. Il y avait avec moi trois théologues,
deux docteurs en médecine, le Doyen de la Faculté
de droit canonique, et le procureur général
de l'université. L'affaire fut discutée en Par-
lement: les portes closes. Séguier plaida
le premier pour l'université; Le Fébvre vint
en second pour la Faculté de médecine; Mar-
illac plaida le troisième pour l'astrologie
divinatoire. Et il ne put rien dire pour
défendre son client. Rameau, avocat du
Roi, parla admirablement après eux
Aussi, après les excellents arguments et les
bonnes raisons données par lui et par nos
avocats. L'astrologie judiciaire et divinatoire
fut-elle condamnée... de première pri-
sent-lui-même se déchaîna contre elle, em-
ballant, frappant d'une manière acerbe l'as-
tronomie. Il consulta les membres du Parlement
lesquels, entendant les avocats mentionner des
divinations de l'astrologie, déchirèrent ces der-
nières avec les dents, sur les dos de Villanovans
Enfin la sentence fut rendue par le président,
mais en vorta assez puisque ledit astrologue ab-
rogea tout ce qu'il avait dit et cent et prouva
de ne plus se faire le défenseur de cette astrologie ju-
diciaire, laquelle avait été yslendite et condamnée par
les prophètes par les conables et bonnes gens philo-
sophes et médecins. The text is in Latin

Broussais letters 402. This one is a touching
letter of his mother ^{at La Roche} to his father about her accouchement
which she saw 10 Janvier 1773. The words are brought
"jusqu'à la porte de la mort". Letters of
Broussais to his father. Confirms for the army
where he served as Captain - former's
Certificate of app. to his father

Note sur les

Commentaires de la Faculté de Médecine de Paris d.
Revue de Bibliothèques. par L. Hahn 1903
vol 13,

As certain 24 vols "who can regard without emotion the
24 volumes containing the manuscript history of the
old Faculty from 1555 to 1788" who a few days
in religious respect to their as incomparable
annals, sent to the main des cent quatre-vingt
quatorze volumes, qui se sont succédé à la tête de
la Compagnie et qui ont relaté lors les
acts importants de leur administration?

Commentaires 25 vols of Ms. all in paper for
1355 to the Revolution. 24 vols are in folio
of diff sizes in old parchment binding.
The 25 vol only got into possession of the
Faculty in 1881

There were ^{no registers} earlier documents. Hahn
the dean has a note in the 1st vol of the
sad loss of earlier records. The volumes
were probably taken by the English in the 100 yrs
war. It has been thought that these
docs. carried the Faculty as far back as 1100 but
Hahn thought that there was no med. instrum
in Paris before 1200, 1270 is the date of the
1st doc. relat to phy in Paris

Jan 7/16-

Hahn showed me the Commentaires today. Wonderful
set, such beautiful state of preservation, in
paper - not a leaf missing. Bound in parchment
of such yellow brown color with clasp.
The 24th the last vol. has been published

Notes on certain books in Bib. de l'Ecole de Med. Paris
 Harvey de motu cordis 1628. In Parchment binding
 the only one I have seen in this form. Very thin
 paper as usual, quite as brown as my copy
 edges frayed. Somewhat cut. Print in little page
 printed obliquely. -- Both folios are at the end
 unusually good & clean impressions. no leaf of marks
 no writing.

Dugdale, Nat. C 1 0 1 0 C X X X I X

Vesal. Epistola. Locius 1539

"1" C 1 Paraphrasis in novum librum Rhazae
 dinvanti 1537. In the preface he mentions
 a preceptore meo D Jacobo Sylvio. "I am
 to pleasure & him". "Audere Andrea Vesalio
 Bruxellensi. Medicine candidato;" in the
 title page and when the text begins. It is a little
 compendium of practice about 212 pp. See
 as to earlier. Works of Rhazes. for which this may
 be called. Begins with: de capitis dolore
 2 de vertigine. 3 de phrenetide 4

3 Epistola rationem modumque propinandi
 radicis chynae decocti; Basilee
 at the end of the letter MD L X V I. Page at end
 MD L X V I. Small folio. Portrait of Vesal
 from the Fabra faces the beg of text. four
 page. add a little cosmo. letter is 1.
 Dict. vno D joachimo Rodants

pp 188 of text. Only 40 are called out
 with the chyme not the rest with the
 dress of Galen anatomy & anatomy of operations
 in last page under the English copy (?) this
 opinion. was this? whole with two Elizabethan
 head. last wh.

4 De Humani Corporis fabrica 1543. Printed by
 Jacobus Vesalius in the back. ^{Basileae} Anno 1543
 The all paper copy. No notes.

Bechal's mass 356-363. Papers de Bechal 1771-1807

VII Observations prises à l'Hôtel Dieu, Paris en l'An 10.

Cases: Printed sheet. Observations / Name

Sex & age / Temperament; état habituel des
fonctions; métrisation &c / caractère, affections
morbides; &c / Profession; genre de vie, climats et
lieux habités; &c / maladies antérieures /

histoire de la maladie avant l'époque où
commencé l'observation. In side large blank

item. in tabular form. I cross - du mois de la maladie
état de l'atmosphère / Phénomènes de la maladie

Particuliers et caractéristiques, symptômes et
symptomatique. Under them others a double
note made

a great many loose per note, cases in tabular
form & very brief

Interesting & little case of Peripneumoniae

admitted An 10. Germinal. Man aged 25. to be

23rd Ventose he was hit and cold at his work. On

25th morning, chills; cough & fever, & sweat; on

the morning pain in the side diff. in localizing
& coughing of blood. Entered The Hotel Dieu on

the 29th the 5th day of the disease - Under the
particulars at char. Then an noted pain in the

chest. - less if he in the bath. Sputum mixed
with blood. Mouth dry. Pulse hard, frequent

intermittent, unequal in the force & duration
of the pulsations. Slight pain in the side

on the 7th day better. 9th day cough better from
better - pulse almost as normal. 10th day

convalescence. He was bled from the arm
had a bed sore on the back, & a furuncle on the

8th day a purge.

Good many cases of pleuro-pneumoniae gastricae

peripneumoniae gastricae. Fièvre intermittente gastrique

One half of the cases are in slips of paper. Fièvre gastro-
adynamique avec parotite. Autopsy no mark of illness

Good case of suppurated tubal pregnancy - all the signs of
"peritonitis" death on 2nd day. Fièvre adynamique
complicquée d'ataxie

In some of his lecture notes remarkable use of synopses. At the
Bourbon 3 & 4 bundles - (even in place). Some very notes for

in other, viz. affectus compliquant la
maladie Accident survenus &c) Régime | Trait-
ment- |.

Mss 162-163 Manuscript de Jérôme Dela-
none, Chirurgien (mort en 1628. 2 vols.
full of interest in the story of the ch. & grand the-
ology in Paris. In the cover of Vol 1 is
an illustrated broadsheet with picture of St
Cosmos & St Damian. La Confrérie de
bien-heureux Martyrs Saint. Cosme & Saint
Damian fondée par les tres-cherchers Roys de
France des l'an mil deux cent vingt-six
Es Eglises dédiées à Dieu, sous les noms
desdits Martyrs, à Paris Vie de la Harpe; et
en l'Eglise Saint Cosme de Luzarches, n'estant
qu'une mesme Confrérie, de laquelle sont
Recheurs, le College & Prévost de M^{re} Chirurgien
jurez en l'Université, fondé & orgé aussi
en même temps audit lieu par le Roy
Saint Denis & confirmé de Roy en Roy, & par
le Roy Louis XIII, a present regnant.
There under the pictures of St Cosmos & St Damian full
the oath & statement of the Recheurs &c. That they would
carry out the duties, &c. & on the 1st Monday of each
month go to mass at 6 am in the church of St Cos & St D
then follow a prayer oraison desdits Martyrs
? Solennisez le 27^{me} Febr. (mort about 1668).
Both vols are of great interest for the history
of surgery.

No 166 also of great interest

The following are some of the most interesting
and valuable specimens of the
ancient Egyptian hieroglyphic script which I have
seen since my return from Egypt. They were found
in the tomb of Amenhotep III., at Thebes, and
are now deposited in the British Museum.
The first specimen is a fragment of a statue of
the king, Amenhotep III., which was found in the
tomb of his father, Amenhotep II., at Thebes.
It is a fragment of a statue of the king, Amenhotep
III., which was found in the tomb of his father,
Amenhotep II., at Thebes. It is a fragment of a

1. Peck, John. 1st Edition 1696. "The
Whole works of that Excellent Practical
Physician Dr Thomas Sydenham"

In Preface. P. says "This author who was
~~particularly~~ ^{exceedingly} despoised for practice &
a vein of sincerity runs through his
whole works, a thing very rare in
Physical authors, especially in the
modern and for this reason it was
he was so much calumniated by ill
men."

"always busied in improving the Practice
of Physick even when he was sleeping
in the threshold of the other world"

"He died at the age of ^{it was} the sixty eight
year of his age; a great age, for one that
had been closely besieged for near half the
time, with the opprobrium Medicorum
the Gout"

"He was religious, loyal, learned, of a
solid judgment and sterling honesty"

"his work will be the best and most
lasting monument of his fame."

My dear friend,
I have just received your letter of the 10th inst. and am
glad to hear from you. I am well and hope this letter
will find you the same. I have not much news to write
at present. I am still in the same place and doing the
same work. I have not much time to write at present.

Small-pox.

stable of warwick ("The Lord Bacon's
Relation of the Sweating-sickness" &c. 1671)
conveys S. as follows "But that which is
most intollible in Dr S. is, that he seems to
attribute all the evil consequences of the Small-
pox to the indiscretion of those that attend them;
be they Barbers, or Physicians. Thus he makes
as if Nature did discharge it self in that
disease into the fleshy parts only; so that of
the eyes, Throat, Stomach, Guts, Arteries in
membranous parts be affected, tis not the
violence of the disease but the ignorance of the
attendants, which occasioned that: which
is intollerable for any man to say & refuted
by experience.

It was opened under the auspices of ^{Leo XII} Pius in 1885 and is used only for manuscripts. It is a room about 70 by 80 ft. long with four windows opening on to one of the courts. At one side between the central windows, Padre Ehrle sits at his desk. At a special desk at end of room are places for members of the Vatican with easy chairs. There are only 4 reader tables. ~~but~~ with place for about 10 readers. The walls are covered with books of the old Cardinal librarians. The books are very accessible. There are full catalogues and it takes only 15-20 min. to get any specimens. The room is only open for 8¹/₂ to 12. daily. There are more scholars than lay readers. Next to me was an ancient Padre with a long grey beard & flowing hair which reached to his shoulders. He was working at great manuscripts and about every 5" stimulated his grey cortex with a big pinch of snuff. Opposite sat a monk in brown - a and a young Englishman. The room is warm, but and also the odor of unwashed humanity & a muddled degree, that smell of clothes soaked with sweat. Even at 9⁴⁵ on entering the room it was evident & it became intensified as the evening wore on. The

My dear Mother
I have just received your letter of the 14th and was
glad to hear from you. I am well and hope this
letter finds you the same. I have been thinking
much of late about the future and how I shall
spend my time. I have decided to go to college
in the fall and study for a year or two. I
shall then go to work for a few years and then
return to college. I shall try to make the most
of my time and to be as useful as I can. I
shall also try to be as happy as I can. I
shall be glad to hear from you again soon.
I am, my dear Mother, ever your affectionate son,
John Smith

1847.
1842

July 11th 1901. Dr George Dock & I dined with
 Professor Korenstein and about 8.0 o'clock
 strolled out along the ^{main} Road for about
 half a mile, then turned into a narrow
 country lane, which with many windings
 led to Oud-Poelgeest (old Pond Marsh)
 the country home of Boerhaave. High stone
 pillars & massive iron gates of unusual
 height open to a drive which leads ^{to the house} ~~to the~~
 an avenue of magnificent beeches; these
 near to the house are of younger growth.
 The owners ~~of the property~~ - Willing(?) by
 name were away & the house was closed,
 but the gardener showed us about the place.
 The property consists of ^{about} ~~some~~ 2 acres, most of
 which is densely wooded, so that as one
 leaves the city on the side it forms
 a marked feature of the landscape.
 The trees curve very close to the house, which
 is a spacious ^{modern} square building, ^{of dark brick} ~~plastered~~
 by terraces which are set forward a little
 from the main building. Coming out
 from the dense avenue it looked as
 sombre as the House of Lescar, ^{but} ~~and~~ ^{there}
~~was~~ ^{was} a weird & solemn stillness was
 soon broken by the furious burling of two
 great dogs, which were hounded & chased
~~apart~~ ^{apart} either corner. A ~~fragrant~~ ^{fragrant} hedge of
 box, with the letters Oud-Poelgeest, threw
 a fragrance in the damp evening air.
 It was a great deprivation not to be able
 to enter the house. On either side there
 was a dense shrubbery, in the midst of
 which to the left stood the magnificent
 ruins of what is known as Boerhaave's
 tree, an American tulip tree which he
 had planted some two hundred years ago.

The main trunk had shot some years ago & had been girdled with wires; one off lower - the large tranches remained, and there were vigorous shoots from which bore beautiful blossoms. One could not but feel that the tree was emblematic in a way of the great School of Leyden, which had as it were lived its life but which now shows signs of new & vigorous shoots. A tablet was placed upon the tree in 1867 with an inscription referring to Boerhaave & his reputation.

On passing to the back of the house what was our surprise to find that it rose directly out of the basin or expanded termination of one of the canals leading directly to Leyden. Professor Rosenstein says pointed out at one angle the door way & the which tradition says Boerhaave took his barge to go to town. Here too Peter the Great anchored his boat when he paid a visit to the great Professor. From the bridge over the canal we got a fine view of the old house, the foundations of which, canals & wings rose directly from the water. The damage & decay of the place may have accumulated for the attacks of various accidents with which Boerhaave suffered. Perhaps in his time the place was more open & other trees had not grown so close to the house; but here they are after the fashions & cases of the day in relation for recreation & repose.

[The text on this page is extremely faint and illegible. It appears to be a handwritten entry, possibly a letter or a journal page, covering the top half of the page. The ink is very light, and the handwriting is cursive.]

The letters of Sydenham

Sydenham's spelling and punctuation are
of the sort common to educated persons
of his time

[The text on this page is extremely faint and illegible, appearing to be a handwritten letter or document.]

Toller Fraternity belonged to the order of St John of Jerusalem
the Knights-Hospitallers to whom it belonged until
the dissolution.

To have photos of outside of register.

+ p 5- 6- 7 & 8 part. 6 & 8 (Rev Mr James
has given his consent. Prince of Dorchester. and do it

Visit to Wymond Eagle.

Aug. 2nd 1898. I took the 11.45 from Paddington, and reached Maiden Newton, Dorset, at about three hours. I wished to see the birthplace of the great Sydenham and also verify the entries in the parish register. Wymond Eagle Church is only a chapel of ease connected with Little Toller and as I ~~could not get a horse~~ ^{at the conveyance office} I ~~was sorry~~ ^{as the village was engaged at a picnic} I walked to the latter place about 1 1/2 miles distant.

X The earliest register at Toller patron begins in the 17th century, but particularly on pp 5-8 there is a manuscript wrongly of the older Wymond Eagle register, which is headed Nomine conjugate. The first ~~entry~~ ^{is} that of ^{the marriage} Thomas Sydenham & Jane Reeves, date 1560. Then follows a long list of marriages chiefly of Sydenhams, and the entry of Dr Sydenham's marriage. as follows
Thomas Sydenham, son unto William Sydenham
senior was married unto Mary Gee in the year
of 1655. Payne has pointed out that we had not known heretofore the name of Sydenham's wife in the date of their marriage. The date is given wrong in Hutchins Dorset. 1685 and this was of course supposed to be another Sydenham.

On p 7 of the register is a long list of baptisms at Wymond Eagle, almost all of Sydenhams, beginning with Elizabeth - 1561, daughter of the aforementioned Thomas Sydenham. On p 8. occurs the entry
Thomas ye sonne of Witt Sydenham Esq was
baptized 10 Sept 1624. Jan. 22.. X

The brother or hereditary John chose a pleasant site for the manor of Toller patron. In the ^{one of} ~~the~~ ^{extensive} ~~valley~~ ^{of the vale of Frome} in the bow of a small hill which rises abruptly from the banks of a small ~~stream~~ ^{stream} a farm house & barn ~~embodies~~ ^{embodies} ~~the~~ ^{all that} remains of the once spacious establishment. The church is new & uninteresting save for a remarkable font and the old register from which I have given you extracts.

see Whitlock's Memoirs

Far from the on adoring crowd at Weyford
a humble or chapelry belonging to ^{little} Toller
Eagle in the garden of England, as
Donet has been called. Thos Sydenham
was born. The place belonged to the great
honnors or barony of Aquila & Eagle in
Sussex, which name it received from
a Norman family called aquila. The
place estate passed from the Zouchs
to Thos. Sydenham, the physician &c.
viii a grandfather in the 36th year of Henry
The Sydenhams were an ancient
family divided into many branches. They
were originally seated at Sydenham near
Bridgwater and Kilsford (Somerset) in
the reigns of King John & Henry III. Hence
arose the various Sydenham families
of Somerset and the Weyford Eagle
Sydenham of Donet (Hatchers).

These were prosperous days in the Sydenham
family. The father was a man of affairs managed
his estate & had a good position in the county. He
had married a Mary the daughter of John
Duffny, and the blessing for full - indeed
richly filled house, was much to be seen in
ten children of whom Thomas was the eldest. Not long
after his arrival the ^{increasing} household warranted
an extension of the old manor house which had
already ^{reverted} ^{generations} of Sydenham. The autumn
of 1624 we may well suppose we find at
Weyford Eagle a happy peaceful prosperous
family. The good mother cooking over her
fire had no misgivings for the future. Brothers
for her she nursed with hope such as all
another's entrance of future greatness for the lucky
little lad she by her side. From her in many were
hid any suspicion of the fact approaching
best in which the whole family would be involved
in which she herself in full maturity would meet a
ruinous death.
Of the childhood and youth of Sydenham we know
nothing, or ^{at least} more correctly we have no
records. In reality we know everything: childhood
and youth are among the unrememberable things. On
the occasion of my visit I saw the little Sydenham
growing into a lane near Toller Tabor, and
with children, including better & better down

Little did he know of the & using drama in
active preparation in the outside world, the the fertile
discussions & the anxious

+ fertile fields & their

To the right of the house is a fine old garden &
beyond it an orchard

To the right of the chapel, beneath in the
slope of the down are the famous alders

The bull were followed as a declivity but a bright
faced little lot - who at the sight of strangers, dodged
back & screamed to his mother. At the gate of a
church at Wyngford Eagle a chubby boy of five was
shepherding the sheep close as he turned the
flock from the road into the field. But the same
flock with other things the little Sydenhams had in
doubtless often helped to drive the flock and I saw
on my way the boy who with nimble stride when
down the road with the shepherd, and again as I sat
on a stile a lot of livestock came through the hedge
with a rabbit - was bawled and a snare. I found
happy days, full of the joys of country life, which
for children are so much heightened in a
large family of boys & girls.

Sydenhams' shooting was probably at first
with the vicar. The nearest town, Bordeaston
would be available for good shooting, was Bordeaston
but we have no information as to his capabilities
or as to the promise of his youth. We know that
he was entered
in

The manor-house of Wyngford Eagle, nestled
in a deep valley faces a wide expanse down from
which it is separated by a small branch of the Teme.
Behind slope the downs brown as I saw them in
August sun & dotted with flocks of sheep. Stretching
far away to the right occupying the base of the hill
was a field of golden barley. To the left, close by the
house ran the roadway, skirted by a fine avenue of
Sycamores leading to the chapel. Two hundred yards
away, beyond the avenue, on the valley as far
as eye could reach was the undulating landscape
of south Shropshire. The house as may be seen
in the picture is quite in keeping with the
position of the Sydenham family in the county.
While much more pretentious than the ordinary
farm-house it is ^{not} more of the "stately homes"
of the county. The double gabled front, very
clean about the roof, is separated by a projecting
porch, which extends the whole height of the house
& is surmounted by a large stone eagle, under which
are carved the figures 1630, a date which probably
represents changes & additions to the old house.

get about the descendants of S. & add here

11
The interior of the house presents nothing of particular
interest. There is one handsome oak-panelled room
with a fine carved mantel piece. There is no trace
or remnant of the Sydenhams - the very name is
forgotten. The old steward had never heard it. The
farmer at Upper Wympston seems much surprised
to learn that so distinguished a man had been
born at the manor house. In his library in a large
map of the island I saw the name Sydenham
attached to a bit of pasture & Bottom land. Dr
Maudslayi tells me that there are
certain in the parish of the name. The chapel
of Wympston castle dedicated to St Lawrence, a chapel
place to the mother church at Toller Talmage.
Many of the Sydenhams are buried here. They
erected a building on the south side of the church
of the old chapel for a burial place with both the
church & the old chapel. Some years ago a
new chapel was built, which hides away like
the new one at Toller Talmage, a corner I doubt
not of endless multiplication to the shades of the
Good Brothers of St John.

Could Sydenham return to life he would find his
old birth place alone untouched by the hand of time
in comparison with the other scenes of his early life
all were so changed & unrecognisable. Thomas Hardy
has well said in describing one of his old Wessex
villages: -

et

At Wympston castle alone Sydenham would escape
that sense of strangeness which is given by the
alteration of place familiar to our childhood. There
is still the same fields & dories, and
talk to the
that centuries would change. The cowed choir
the stream & pass to the point of his old home
with that same sense of
had so often returned to the name of his parents
only in the churchyard. The spot of disenchanted
ground would come in the churchyard - a shock
over the Puritan road to see

History of Rome. Dury. Hegon Part 1 is 1886 vol. 2.

p 405 Good in Roman History
edition a special note for the manuscript Rome

p 764 as usual.

"a word with the title" The covers of the La Verité was
prepared in the library of Voltaire "of a good one, in
replied "I ought to have said the volume on part one
and half a page in the second part" : we are plenty
the half page but study"

The nations, crude tho they be, have the
instinct of being the stepping stone on which we have
risen to a higher knowledge.

To attain some practical belief and understanding of the condition of the people even during the 17th century is by no means an easy task. Sydenham is to be interpreted not less by himself than by the contemporary history of medical thought. I have given a strong effort - not often successful - for a ^{student} ~~novice~~ to the end of the 17th century to breathe the atmosphere of those days to the influence & tradition handed down to the use of Sydenham can only be estimated

Letter iii. vol. xiv p 401 From Salzburg, Oct. 10. 1671
Thomas. I much about his health

"My cough sensibly abated"
So many kindnesses, on so thin a subject. I must
conclude my carcass to be made of very ill com-
position that will not grow into good plight in
fresh air. I am so little pleased with my
absence from you, and the rest of the friends
you mention, that I am often at variance with my
body about it and sometimes I purchase health
dear at that rate"

Evidently the climate of London was killing him
14th Feb. 72-73 he writes + wrote left from
where he had had a letter about the sunshine
& cold air "but what would you have a man
do ~~where~~ where progress a he with the cold whilst
he is unwilling to those who brag of the warmth
and sunshine"

In this letter he says "Dr Sydenham & I mention
you sometimes, for we do not ~~do~~ now meet
often"

Letter 4. Letter Home. Oct 19. 72. "in French
which is the very most of compliment and with
excuse - dull of it with only safe"

Letter VI & VII from Paris 1677 In vi. begins
after Sydenham of future illness he had
heard.

"One is never sure of oneself, and the
time may come when I may resign myself
up to the temper of the soft sex"

Letter IX Paris Dec 4 Dec. 1677 Begins with
an apology for so unwelcome an occasion spending
"On Thursday ^{night} last I was sent for to my lady
ambassadress, whom I found in a fit of great
violent & sincere lament, that, (though she
be, as you know, a person of extraordinary temper

and I have seen her in the course of this disorder
endure very great pain with a patient (but seemed to feel
nothing) & forced her to such cries & shrieks as you would
expect from one upon the rack, to which I believe her was
an equal torment, which extended itself all over the
right side of ^{her} face and mouth. When the fit came, there
was, to me my lady's own expression as I were a
flask of fire all of a sudden shot into all those
parts: and at every one of these twitches, which made
her shudder in her mouth was constantly drawn
on the right side towards the right ear by repeated
convulsive movements, which were constantly ac-
companied by her cries. This was all that appeared
outwards in these fits according to the greatest obser-
vation I could make. Having had but too many
opportunities to do it. These violent fits terminated
in a sudden and then my lady seemed the
perfectly well, excepting only a dull pain which
ordinarily remained in her teeth on that side
and an increase in that side of her tongue
which she ^{perceived} to be swollen on that side, which
fit when I looked on it as I often did had not the
least alteration in its colour, figure or any other
way, though it were one of her great complaints
but then came a scalding liquor in her fits shot into
all that half of the tongue. This had usually a prelude
of the fit by a little throbbing upon her gum of the lower
jaw where she had this summer a tooth drawn &
a little throbbing in the upper jaw, just over against it.
On all this time of her being ill she has not found
the least pain in all the other side of her face or teeth
which has soe wholly preserved the right side that
I went ever to the very tip of her tongue and the
last tooth before in that side. When all this torment
was over there was not the least appearance of any
alteration any where in her face, nor inflammation
or swelling in her mouth or cheeks; very little deflu-
tion of rheum & more than what the discharges of
these parts in these fits might cause. Spending
was apt to put her into these fits, sometimes opening
her mouth to take anything, or touching her gums
especially in the places where she used to find these
throbbings; pressing that side of her face by going
on it were also apt to put her into fits. These fits
lasted sometimes longer sometimes shorter, were
more or less violent, without any regularity; and
the intervals between them at the longest not half
an hour, commonly much shorter.

At this describes the treatment: I spent an-
dye applications to the gums: which gave relief

137

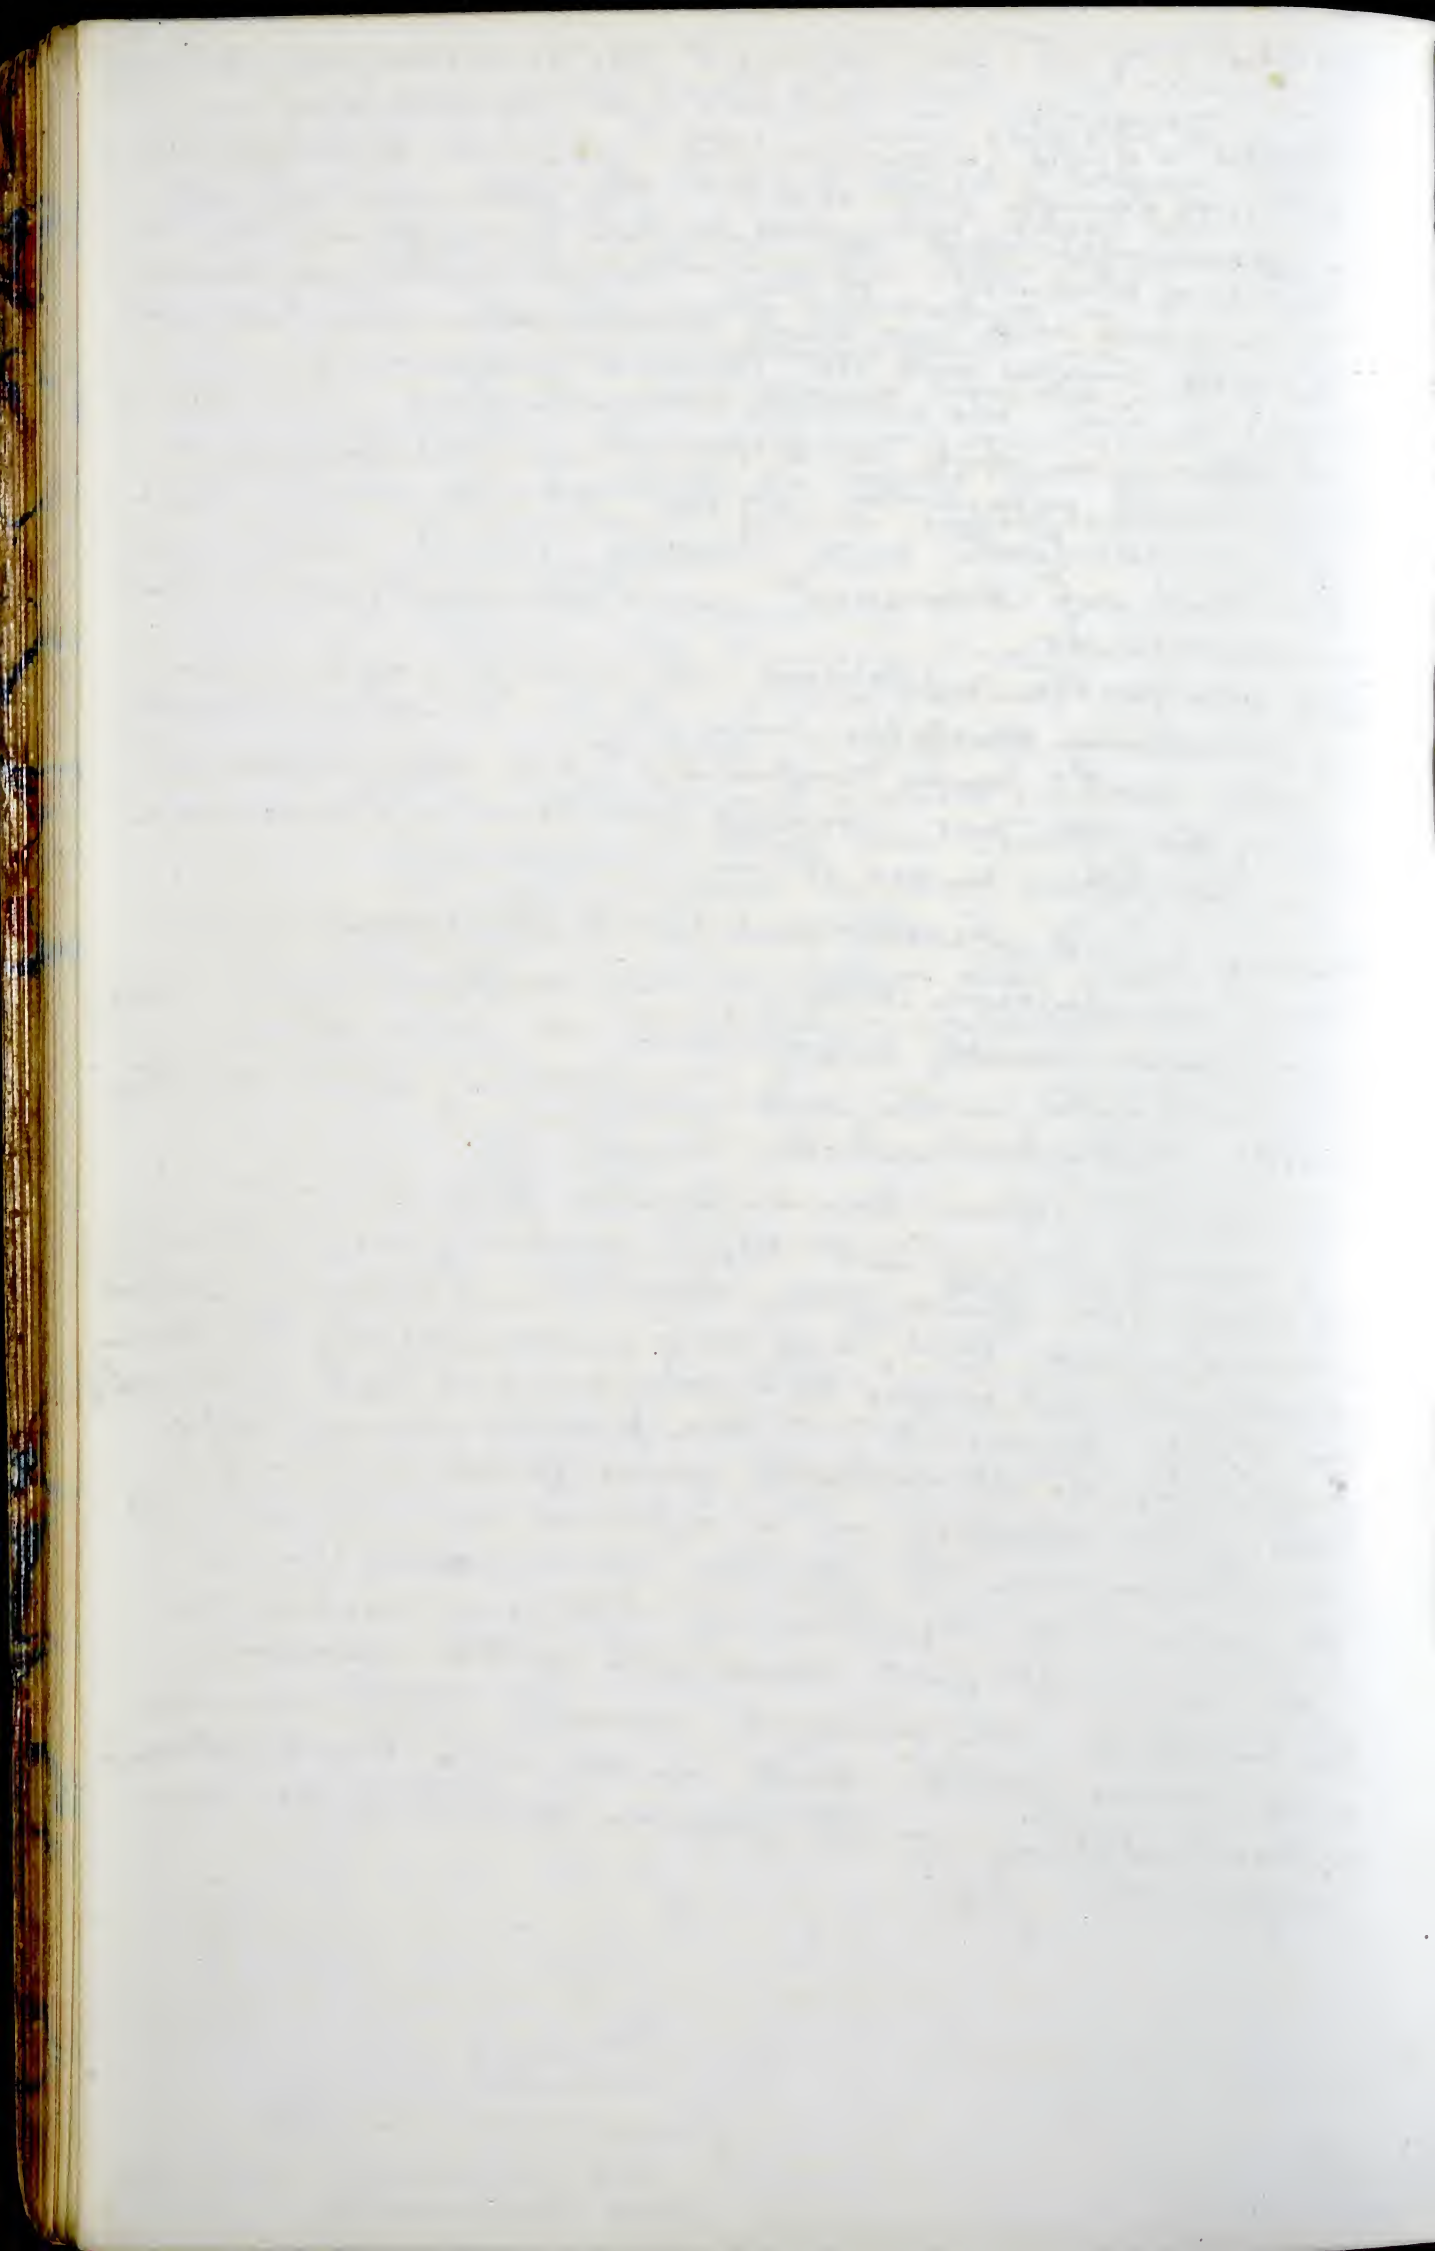

The next day the fits returned she was purged. Bleeding was considered but she had been so often & so much bled in a little season this summer without help that doctor thought best not to. The next night she took a goodly cordial but during the first hour had the fits - very severely. He says "I wish with all my heart you were here" as lady notwithstanding had had much success with the French physicians in the summer that she could not have them. He asks "whether you did not think this to proceed from some affection in the nerves in the place where the tooth was drawn, which draws all the rest into consent and convulsive motions on this side."

At one in the afternoon he writes again that a blistering plaster has been placed on the back of the neck - (inter scapulas) "She also especially when the fits are most violent - a dressage in her lips more than ordinary."

Sunday night (Letter XI) he writes again. with great satisfaction telling of her improvement "which is not now much more than the grumbling of the loathings, with now and then some shooting" asks for the best advice you can get.

Dec 22nd "Upon reading our friends letter I was ready to cry out. 'The spirit of the Prophets' as upon the sins of the Prophets; I having in what I have done here, not only proceeded by the same method but used the very remedies & directed as to the maine." "For prevention I little mightily the plantain and spirit of vitriol." Tells of the drawing as a adroit and for an life to strengthen the genus nervosum as he thought that hysterical vapours increase the humors - and disorder in the nerves.

He suspects an ancient fault of the nerves in the nerves of that side as she had had extreme violent itching in the groin on that side long before the fits.

Diary of the Rev. John Ward. Vicar of Stratford
upon Avon extending from 1648 to 1679, from the
MS in the library of the Med. Soc. of London.
arranged by Charles Severn M.D. Lond. 1839

- p 9. Description of or Scarborough. Feb 26. 1661. at
the Barber - Chirurgeons Hall. Anatomy lectures.
- " 12. Doctors dinner at Leyden he says cost 16 pounds
besides the feasting of the Professors; at Angers
not above nine pounds, and feasting not
necessary neither.
- " 13. Curious about Archbishops licence - not good per
Totam Angliam
- " 97. a report of Hippocrates that he said of physicians
" that they should cure others with simples
& compounds & themselves with salt & clove"
One told the Op of Gloucester that he imagined
100. "physicians of all other men were the
most competent judges of all others affairs of
religion; and his reason was because they
are wholly unconcerned with it
- 104 One asked Dr Osborston how hee lived so
long in health, hee made this answer, Parce
canavi, solus cubavi, curas fugavi"
- 111 Some say when man list free will woman
found itt & hath kept itt ever since.
- 114 Budens wished some learned divines to be
sent to utopia to preach the gospel.
- 116 Adrian asked Epictetus what love was
& he replied: in pueris pudor; in virginis,
rubor, in puerum, furor; in juvene, ardor
in senex, virus"
- 116 about foundation of Royal Soc by char II to
emulate a Soc. found by Harrington of the
"Oceanus" & his Commonwealth fellows
119. Ubi tres medici, ibi tres alibi he quote
to deny.
127. Rowland Hey when hee heard that his father
was tapped said hee "Is my father tapped? then hee will
not last long for nothing lasts long in our house after
itt is tapped"

135. Mr Boyle never drinks any strong drink; he every morning eats bread & butter with powder of eggs broght spread in the butter. His supper is water - gruel & a couple of Eggs; his dinner is mutton or veal or a pullet, & walking hence (as he calls them) which goes to the turn door when they will. He is but 36 years old He reads a chapter in Greek & one in Hebrew every morning.

137. "Dr Harvey lived till he doated, as I have heard say & would call it very weakly."

138. Shakespear "he spent at the rate of £1000 a year as I have heard."

"Shakespear & Dryden & Ben Jonson had a merry meeting, & it seems drunk to hand, for Shakespear died of a peavour there contrived."

141. Some says too shortly of physicians that they see their practice and the earth hides their faults.

144. Jupiter queen odit, facit pædagogum.

146. Comments the preface to Selden History of Tithes & to Harveys de generatione a "two noble exhortation to undertake what we receive for tribute."

201. Audi, vide Tace, vis vis vivere in pace

218. Plant me eye of faith in the eye of the soul & it will utterlie darken with its heavenly brightness the eye of reason sense and reason, as the sunne the lesser starres.

230. The pangs of death are often less than that of the toothack.

237. Jiquines, rigles, cilies si rheumata cures

241. Famine sunt medicorum tubæ

" Dr Sydenham is writing a book which will bring physicians about his ears, to decrie the usefulness of natural philosophie and to maintain the necessity of knowledge in anatomy in subordination to physick.

Physick say. Sydenham is not to be learned by going to universities; but he is for taking apprentices; and says one had as good send a man to Oxford to learn shoemaking as practising physick.

161.
h 244 Manual extraction of a breast cancer, 2 surgeons
working at it till their hands met.

71. 250 Cannot you use a loving violence? One
Phipps - & when he gave anything desperate
he would say "With all they may die, but without
it they will die"

" 265 Four things make a practical physician; first,
to have a vast store of medicine in his head; second,
pertinently to prescribe; third to act to judge of the
disease; fourth to have good prognosticks, the
last is for his credit chiefly.

267 mentions a physician who got drunk once a
month for his health

" 278 There are severall sorts of physicians said
one; first, those that canne talk but do
nothing; secondly, some that canne doe
but not talk; third some that can both doe
and talk; fourthly some that can neither
doe nor talk; & these get most monie"

" 281 a dyet-bag

" 283 Tom Triplett - gave this reason why the
Puritans spatte through their noses - it was
became the high commission stopped their
mouths.

" 298 Dr Highmore of Sherborne married Dr
Haddocks daughter of Salisbury & Haddock
had got some fine cuts, which Highmore lett
upon, and marrying his daughter, enjoyed
them; and studying anatomy putt into the
book with three cuts, which somewhat raised
his name

311 Some physicians recipes prove decipes

" Many Medicines have caused few cure
and many dishes have secured many distempers

Aug. 12/1894

Pronounced Dun-sai the farm occupies a delightful situation in a valley between the Purbeck Hills & Nine Barrow Downs, about a few miles from Corfe Castle. Leaving the Kingston road the ~~farm~~^{house} is reached by a rough & rutted road thro' the fields, with many steep descents. It is not seen at first, indeed we did not look for it as our whole attention was centred on the superb outlook, to the left in the valley some 100 yds. the ruins of Corfe Castle, guarding the gateway to the Isle of Purbeck, - to the right the town of Swanage with its fine ^{blue} bay, & far off on the horizon the white cliffs of the Isle of Wight (The Needles) while across the valley rose the fine sweep of the Nine Barrow Down. Encircled by trees & in a depression we did not see the house until we reached the barn-yard stile - where we were cordially greeted by a jolly-looking dairyman who had just driven out one herd and was preparing to finish the evening milking. ~~A dairy farm cannot be judged by ordinary standards - grass & not cattle a stone~~ The entrance to the ~~Garden~~ was through a fine old stone gateway by the side of which was the usual stone stepping for mounting. The house was of the type common on the Island - of two stores & very well built, looking very fresh and clean after two hundred & fifty years. The date was carved on one end of house.

My dear friend

I have just received your letter of the 10th inst. and am
glad to hear from you. I am well and hope these few lines
will find you the same. I have been thinking much of late
of the future of our country and the state of the Union.
I feel that we are in a critical position and that the
people are called upon to make a great effort to preserve
our liberties and our Union. I hope that you will be
able to do your part in this great work. I am, my friend,
your sincere friend and ever,
Yours truly,
Wm. Lloyd Garrison

Tom was a low headed kind of a fellow, he was

A game of Sixes on Pommaburg Ring
Players: Tom Lowell, Er. Rowe, Dave
Hayes, E. G. D., & T. McC. and a wall-eyed
Sheepdog.

On the north side of the celebrated Pommaburg
ring, on the turf wall of the rampart at
3 pm July 26th lay three boys, two
men and a venerable dog. The positions
were as in annexed diagram. Tom boy

Tom. E. G. D. Dave
Dog. T. McC. E. G. D.

The party and had the cards - a small,
dirty, dog-eared but complete pack. The
game he said was sixes, which I did
not know so I put up 3'd in middle
which played for by the boys, and that we
could catch the trick of the game. Tom
dealt one first then two, then three,
not always in order & it was evident
that so long as each boy got six I did
not matter how they came. He led
off with the ten of hearts, which he called spades,
in ignorance I thought as he was young &
with a green hand. Dave covered with
~~what he called a trump~~ ^{as he said with} a four or six of hearts
spades, and Tom took the trick proudly
with a face card - the Knave of hearts.
